

Clearing Cache – Google Chrome

Step 1: Click on the  button at the top right corner, hover the cursor over **More tools**, and click on **Clear browsing data...**. Alternatively, press the **Ctrl**, **Shift** and **Delete** keys on your keyboard together to access it directly.

Step 2: Untick all the options except **Cached images and files** which should be ticked. Choose **the beginning of time** from the dropdown menu and click on **Clear browsing data**.

Step 3: Your cache is now cleared and you may close the **Settings** tab.
