51	Automatically change of declaration type

Status Code	Description
98	Deactivated
99	Deactivated ? moved to archive on other media.

Comments:...Of particular importance are the following three status codes;

1. **Status Code 22. Automatically taken out to control (red).**
   Following Risk Analysis, the declaration has been flagged as high risk. This means that the declaration is selected for control.

2. **Status Code 28: Waiting for other manual release than Goods regulations e.g. check of payment.**
   For the status code to change, the declarant must first pay the taxes due to Customs.

3. **Status Code 40: Accepted and Released.**
   All payments and/or controls have been effected. The goods can now be released.

> # It is important to remember that goods can only be released after declaration reaches Status 40.
